OVERVIEW

This audit has been perpared for **'Incognitech'** to review the main aspects of the project to help investors make an informative decision during their research process

You will find a summarized review of the following **key points**:

📄   **Contract's source code**

👛   **Owner wallets**

🛸   **Tokenomics**

👥   **Team transparency and goals**

</>   **Website's age, code, security and UX**

📊   **Whitepaper and roadmap**

🔍   **Social media and online presence**

General Analysis

Audit Review Process

1 Testing the smart contracts against both common and uncommon vulnerabilities

2 Assessing the codebase to ensure compliance with current best practices and industry standards

3 Ensuring contract logic meets the specifications and intentions of the client

4 Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders

5 Thorough line-byline AI review of the entire codebase by industry

Detail Analysis

Threat Level

|	
● High	Issues on this level are critical to the smart contract's performace/functionality and should be fixed before moving to a live enviroment
● Medium	Issues on this level are critical to the smart contract's performace/functionality and should be fixed before moving to a live enviroment
● Low	Issues on this level are minor details and warning that can remain unfixed
● Informational	Informational level is to offer suggestions for improvement of efficacy or secruity for fratures with risk free factor

Threat Level

● High	**2** threats found
● Medium	**0** threats found
● Low	**0** threats found
● Informational	**0** threats found

Detail Analysis

Vulnerability Check ● 19 Passed ● 2 Fail

● Reentrancy   ● Flash Loans   ● Unused Code   ● Sybil Attack

● Front Running   ● Oracle Issues   ● Logical Issues

● Compiler Issues   ● Improper Events   ● Race Conditions

● Unbounded Loops   ● Signature Issues   ● Ether/Token Theft

● Integer Over/Underflow   ● Overall Contract Safety

● Centralization of Control   ● Outdated Compiler Version

● Arbitrary Jump/Storage Write   ● Improper Authorization Scheme

● Delegate Call to Untrusted Contract   ● Dependence on Predictable Variables

Detail Analysis
